Operational aircraft: Fighter aircraft

1934 - PZL P.11: Poland

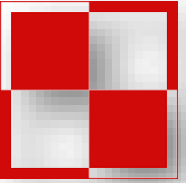

Polish P.Z.L. P-11c

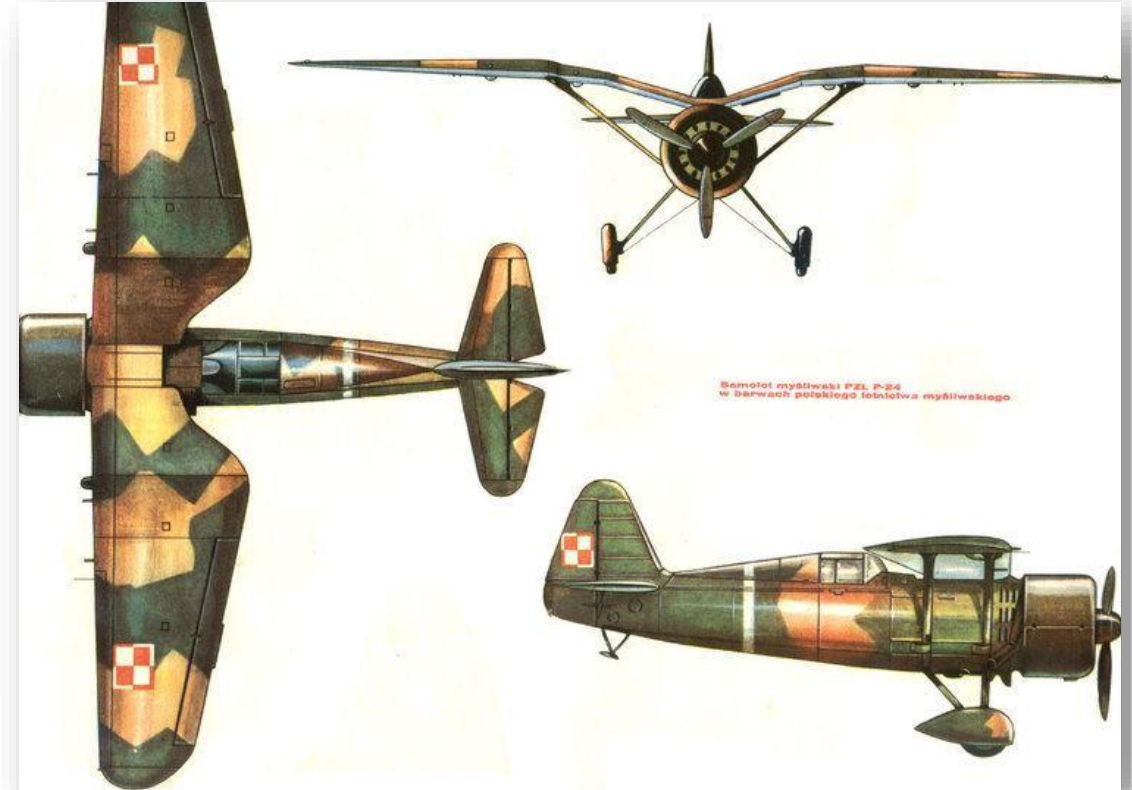

Engine: one P.Z.L.-built Bristol Mercury VI
S.2 9-cylinder air-cooled radial, 645-hp at
take-off.
Armament: two 7.7-mm KM Wzor 37 machine
guns with 500 rounds per gun in the fuselage,
two 7.7-mm KM Wzor 37 machine guns with
300 rounds per gun in the wings, and four 27-lb
bombs.
Speed: 243 mph at 18,044 feet.
Climb: 6 minutes to 16,400 feet.
Ceiling: 36,080 feet.
Range: 503 miles.
Weight empty/loaded: 2,529/3,968 lbs.
Span: 35 feet 2½ inches.
Length: 24 feet 9½ inches.
Height: 9 feet 4½ inches.

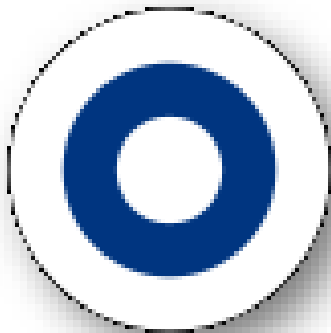

Operational aircraft: Fighter aircraft

1936 - PZL P.24: Poland

Finnish Air Force

Operational aircraft: Fighter aircraft

1943 - VL Myrsky: Finland

VL MYRSKY II "MY-50"
Hävittäjälentolaivue 11, Finnish Air Force
In Service From 1945-1947

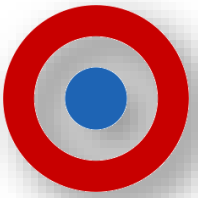

The VL Myrsky II was a piston-engine propeller-driven fighter manufactured by the State Aircraft Factory (Valtion lentokonetehdas or VL) on behalf of the Finnish government. The Myrsky II was the primary production variant of the Myrsky family, with the Myrsky I being a pre-production variant and the Myrsky III being cancelled before being put into service.

The Myrsky II was powered by a Pratt & Whitney radial engine and was armed with four .50 caliber machine guns. It was used primarily as a fighter and reconnaissance aircraft and served alongside the likes of the Bf 109 and Curtiss Hawk 75 during the Continuation War. The Myrsky left Finnish service in 1947 following the end of World War II and new restrictions placed on Finland's air force by the victorious Allied powers.

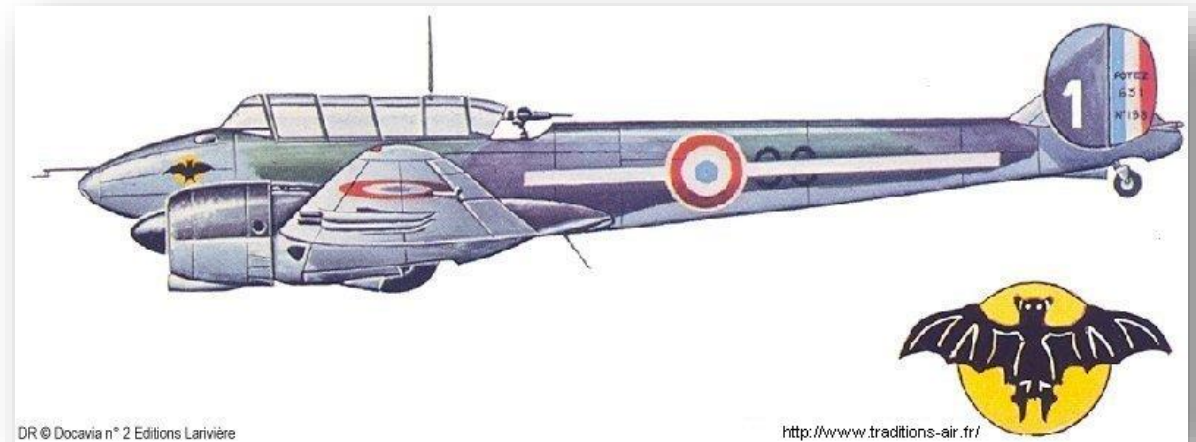

The aircraft with serial number MY-50 was the second to last Myrsky II delivered to the Finnish Air Force. It featured a black and olive green camouflage scheme on its upper surfaces and light blue on its lower surfaces. It donned the new Finnish Air Force roundel, replacing the blue swastika roundel following an Allied Control Commission ban on the symbol in 1944. Further, it did not bear the yellow identification markings around the fuselage and engine cowling common on earlier models.
